STANDARDS: A Trained "T" rating will be noted for compliance (GO) when no critical deficiencies are observed, and minor deficiencies are corrected on the spot. A Needs Practice "P" rating will be noted when the number of non-critical deficiencies noted is less than 5 and the severity of each is such that security and accountability is maintained, and unit actions are initiated or being implemented during the inspection to correct the cited minor deficiencies. An Untrained "U" rating will be noted for all critical (NO GO) re-occurring deficiencies, one critical deficiency or 5 or more non-critical deficiencies. A "U" requires immediate command emphasis to initiate corrective actions. This checklist is a general guide used by inspectors to cover appropriate areas. When other deficiencies or weak areas are recorded, a further in-depth inspection may occur to ensure security standards are maintained. **Note:** This checklist applies to all levels at the BDE, BN, CO, and any activities/directorates on FLW.
